# Independent Auditors' Report

## To the Shareholders and Council of ID Bank CJSC

### Opinion

We have audited the financial statements of ID Bank CJSC (the ԻԴԲանկՍԼ), which comprise the statement of financial position as at 31 December 2021, the statements of profit or loss and other comprehensive income, changes in equity and cash flows for the year then ended, and notes, comprising significant accounting policies and other explanatory information.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Bank as at 31 December 2021, and its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards (IFRS).

### Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditors' Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Bank in accordance with the International Ethics Standards Board for Accountants International Code of Ethics for Professional Accountants (including International Independence Standards) (*IESBA Code*) together with the ethical requirements that are relevant to our audit of the financial statements in the Republic of Armenia, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

### Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

<b>Expected credit losses for loans to customers</b>	
Please refer to the Note 25(b) and Note 15 in the financial statements.	
<b>The key audit matter</b>	<b>How the matter was addressed in our audit</b>
<p>Loans to customers represent over 60% of total assets and are stated net of allowance for expected credit losses (hereinafter, the <b>РЕСЛУ</b>) that is estimated on a regular basis and is sensitive to assumptions used.</p> <p>The ECL valuation model requires management to apply professional judgement and to make assumptions related to the following key areas:</p> <ul style="list-style-type: none"> <li>- timely identification of significant increase in credit risk and default events related to loans to customers (allocation between Stages 1, 2 and 3 in accordance with the IFRS 9 <i>Financial Instruments</i> (hereinafter, <b>РИFRS 9УЛ</b>));</li> <li>- assessment of probability of default (PD) and loss given default (LGD);</li> <li>- assessment of add-on adjustment to account for forward-looking information;</li> <li>- expected cash flows forecast, including from realization of collateral for loans to customers classified in Stage 3.</li> </ul> <p>Due to the significant volume of loans to customers, and complexity and subjectivity over estimating timing and amount of ECL this area is a key audit matter.</p>	<p>We analysed the key aspects of the Bank's methodology and policies related to ECL estimates for compliance with the requirements of IFRS 9, including through involvement of financial risks management specialists.</p> <p>To analyse the adequacy of professional judgement and assumptions made by the management in relation to the ECL estimate our audit procedures included the following:</p> <ul style="list-style-type: none"> <li>- for loans to corporate clients we assessed and tested the design, implementation and operating effectiveness of the controls over allocation of loans into Stages.</li> <li>- for a sample of loans to corporate clients, we tested whether Stages are correctly assigned by the Bank by analysing financial and non-financial information, as well as assumptions and professional judgements, applied by the Bank.</li> <li>- for a sample of loans to corporate clients, where ECL are assessed individually, we tested the correctness of data inputs for PD and LGD calculation.</li> <li>- for a sample of Stage 3 loans, where ECL are assessed individually, we critically assessed assumptions used by the Bank to forecast future cash flows, including estimated proceeds from realisable collateral and their expected disposal terms based on our understanding and publicly available market information. We specifically focused on those loans to customers that potentially may have the most significant impact on the financial statements.</li> <li>- for loans to individuals we tested the design and operating effectiveness of controls over completeness and accuracy of data inputs into ECL calculation models, timely reflection of delinquency events and loan repayments in the underlying systems and allocation of loans into Stages.</li> </ul>

	<p style="text-align: center;">-</p> <p>for loans to corporate and individual customers, where ECL are assessed collectively, we tested the correctness of the related models and reconciled the model input data against primary documents on a sample basis.</p> <p>we assessed the predictive capability of the Bank's ECL calculation methodology by comparing the estimates made as at 1 January 2021 with the actual results for 2021</p> <p>we assessed whether the financial statements disclosures appropriately reflect the Bank's exposure to credit risk.</p>
--	---

### Other Information

Management is responsible for the other information. The other information comprises the information included in the annual report, but does not include the financial statements and our auditors' report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

### Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Bank's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Bank or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Bank's financial reporting process.

### Auditors' Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud

or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion.

The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Bank's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Bank's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Bank to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes

public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partner on the audit resulting in this independent auditors' report is:

Tigran Gasparyan  
Managing Partner, Director of KPMG Armenia LLC

KPMG Armenia LLC

## 2 Background

### (a) Organisation and operations

ID Bank CJSC (the “Bank”) was established in the Republic of Armenia as a limited liability company in 1990, and reorganised into a closed joint stock company in 2007. Previously the bank operated under the brand name Anelik Bank CJSC. In June 2018 the Bank was renamed to ID Bank CJSC.

The principal activities of the bank are deposit taking, customer account maintenance, credit operations, issuing guarantees, cash and settlement operations, and securities and foreign exchange transactions. The activities of the Bank are regulated by the Central Bank of Armenia (the “CBA”). The Bank has a general banking license and is a member of the state deposit insurance system in the Republic of Armenia.

The Bank’s registered office is 13 Vardanants Street, Yerevan 0010, Republic of Armenia. The Bank has 13 branches. The majority of its assets and liabilities are located in the Republic of Armenia.

The Bank’s shareholders are FISTOCO LTD (59.68%) and Creditbank SAL (40.32%). The Bank is ultimately controlled by a single individual, Mr. Vartan Dilanyan. The shareholders’ structure has changed after the reporting date (Note 31).

Related party transactions are described in detail in Note 29.

### (b) Armenian business environment

The Bank’s operations are primarily located in Armenia. Consequently, the Bank is exposed to the economic and financial markets of Armenia which display characteristics of an emerging market. The legal, tax and regulatory frameworks continue development, but are subject to varying interpretations and frequent changes which together with other legal and fiscal impediments contribute to the challenges faced by entities operating in Armenia. The COVID-19 coronavirus pandemic has further increased uncertainty in the business environment.

The financial statements reflect management’s assessment of the impact of the Armenian business environment on the operations and the financial position of the Bank. The future business environment may differ from management’s assessment.

## 3 Basis of preparation

### (a) Statement of compliance

The accompanying financial statements are prepared in accordance with International Financial Reporting Standards (“IFRS”).

### (b) Basis of measurement

The financial statements are prepared on the historical cost basis except that financial instruments at fair value through profit or loss (FVTPL) and investment securities at fair value through other comprehensive income (FVOCI) are stated at fair value, and buildings are stated at revalued amounts.

**(c) Functional and presentation currency**

The functional currency of the Bank is the Armenian Dram (AMD) as, being the national currency of the Republic of Armenia, it reflects the economic substance of the majority of underlying events and circumstances relevant to them.

The AMD is also the presentation currency for the purposes of these financial statements.

Financial information presented in AMD is rounded to the nearest thousand.

**(d) Use of estimates and judgments**

In preparing these financial statements, management has made judgement, estimates and assumptions that affect the application of the Bank's accounting policies and the reported amounts of assets and liabilities, income and expense. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimates are revised and in any future periods affected.

**Judgements**

Information about judgements made in applying accounting policies that have the most significant effects on the amounts recognised in the financial statements is included in the following notes:

- classification of financial assets: assessment of the business model within which the assets are held and assessment of whether the contractual terms of the financial asset are solely payments of principal and interest on the principal amount outstanding – Note 3(e)(i).
- establishing the criteria for determining whether credit risk on the financial asset has increased significantly since initial recognition, determining methodology for incorporating forward-looking information into measurement of ECL and selection and approval of models used to measure ECL – Note 25(b).

**Assumptions and estimations uncertainty**

Information about assumptions and estimation uncertainties that have a significant risk of resulting in a material adjustment within the next financial year is included in the following notes:

- impairment of financial instruments: determining inputs into the ECL measurement model, including incorporation of forward-looking information – Note 25(b);
- estimates of fair values of financial assets and liabilities – Note 30;
- building revaluation estimates – Note 16;
- assessment of impairment of repossessed assets – Note 15.

**(e) Changes in significant accounting policies**

A number of amendments to the existing standards are effective from 1 January 2021 but they do not have a material effect on the Bank's financial statements.

## 4 Significant accounting policies

The accounting policies set out below are applied consistently to all periods presented in these financial statements.

### (a) Foreign currency transactions

Transactions in foreign currencies are translated to AMD at exchange rates at the dates of the transactions.

Monetary assets and liabilities denominated in foreign currencies at the reporting date are retranslated to AMD at the exchange rate at that date. The foreign currency gain or loss on monetary items is the difference between amortised cost in the functional currency at the beginning of the period, adjusted for effective interest, impairment and payments during the period, and the amortised cost in foreign currency translated at the exchange rate at the end of the reporting period.

Non-monetary assets and liabilities denominated in foreign currencies that are measured at fair value are retranslated to the functional currency at the exchange rate at the date that the fair value is determined. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rate at the date of the transaction.

Foreign currency differences arising on retranslation are recognised in profit or loss, except for equity instruments in respect of which an election has been made to present subsequent changes in fair value in other comprehensive income. For such investments foreign currency differences arising on translation are recognised in other comprehensive income.

### (b) Cash and cash equivalents

Cash and cash equivalents include cash on hand and unrestricted balances (nostro accounts) held with the CBA and other banks. The mandatory reserve deposit with the CBA is not considered to be a cash equivalent, due to restrictions on its withdrawability. Cash and cash equivalents are carried at amortised cost in the statement of financial position.

### (c) Interest

#### *Effective interest rate*

Interest income and expense are recognised in profit or loss using the effective interest method. The 'effective interest rate' is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument to:

- the gross carrying amount of the financial asset; or
- the amortised cost of the financial liability.

When calculating the effective interest rate for financial instruments other than purchased or originated credit-impaired assets, the Bank estimates future cash flows considering all contractual terms of the financial instrument, but not expected credit losses. For purchased or originated credit-impaired financial assets, a credit-adjusted effective interest rate is calculated using estimated future cash flows including expected credit losses.

The calculation of the effective interest rate includes transaction costs and fees and points paid or received that are an integral part of the effective interest rate. Transaction costs include incremental costs that are directly attributable to the acquisition or issue of a financial asset or financial liability.

***Amortised cost and gross carrying amount***

The 'amortised cost' of a financial asset or financial liability is the amount at which the financial asset or financial liability is measured on initial recognition minus the principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount and, for financial assets, adjusted for any expected credit loss allowance.

The 'gross carrying amount of a financial asset' measured at amortised cost is the amortised cost of a financial asset before adjusting for any expected credit loss allowance.

***Calculation of interest income and expense***

The effective interest rate of a financial asset or financial liability is calculated on initial recognition of a financial asset or a financial liability. In calculating interest income and expense, the effective interest rate is applied to the gross carrying amount of the asset (when the asset is not credit-impaired) or to the amortised cost of the liability. The effective interest rate is revised as a result of periodic re-estimation of cash flows of floating rate instruments to reflect movements in market rates of interest.

However, for financial assets that have become credit-impaired subsequent to initial recognition, interest income is calculated by applying the effective interest rate to the amortised cost of the financial asset. If the asset is no longer credit-impaired, then the calculation of interest income reverts to the gross basis.

For financial assets that were credit-impaired on initial recognition, interest income is calculated by applying the credit-adjusted effective interest rate to the amortised cost of the asset. The calculation of interest income does not revert to a gross basis, even if the credit risk of the asset improves.

For information on when financial assets are credit-impaired, see Note 3(e)(vi).

***Presentation***

Interest income calculated using the effective interest method presented in the statement of profit or loss and other comprehensive income includes:

- interest on financial assets measured at amortised cost;
- interest on debt instruments measured at FVOCI.

Interest expense presented in the statement of profit or loss and other comprehensive income includes financial liabilities measured at amortised cost.

**(d) Fees and commission**

Fee and commission income and expense that are integral to the effective interest rate on a financial asset or financial liability are included in the effective interest rate (see Note 3(c)).

Other fee and commission income – including account servicing fees, investment management fees, sales commission, placement fees and syndication fees – is recognised as the related services are performed. If a loan commitment is not expected to result in the draw-down of a loan, then the related loan commitment fee is recognised on a straight-line basis over the commitment period.

A contract with a customer that results in a recognised financial instrument in the Bank's financial statements may be partially in the scope of IFRS 9 and partially in the scope of IFRS 15. If this is the case, then the Bank first applies IFRS 9 to separate and measure the part of the contract that is in the scope of IFRS 9 and then applies IFRS 15 to the residual.

Other fee and commission expenses relate mainly to transaction and service fees, which are expensed as the services are received.

**(e) Financial assets and financial liabilities**

*i. Classification*

**Financial assets**

On initial recognition, a financial asset is classified as measured at: amortised cost, FVOCI or FVTPL.

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVTPL:

- the asset is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

A debt instrument is measured at FVOCI only if it meets both of the following conditions and is not designated as at FVTPL:

- the asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and
- the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

For debt financial assets measured at FVOCI, gains and losses are recognised in other comprehensive income, except for the following, which are recognised in profit or loss in the same manner as for financial assets measured at amortised cost:

- interest income using the effective interest method;
- ECL and reversals; and
- foreign exchange gains and losses.

When a debt financial asset measured at FVOCI is derecognised, the cumulative gain or loss previously recognised in other comprehensive income is reclassified from equity to profit or loss.

On initial recognition of an equity investment that is not held for trading, the Bank may irrevocably elect to present subsequent changes in fair value in other comprehensive income. This election is made on an investment-by-investment basis.

Gains and losses on such equity instruments are never reclassified to profit or loss and no impairment is recognised in profit or loss. Dividends are recognised in profit or loss unless they clearly represent a recovery of part of the cost of the investment, in which case they are recognised in other comprehensive income. Cumulative gains and losses recognised in other comprehensive income are transferred to retained earnings on disposal of an investment.

All other financial assets are classified as measured at FVTPL.

In addition, on initial recognition, the Bank may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortised cost or at FVOCI as at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

### **Business model assessment**

The Bank makes an assessment of the objective of a business model in which an asset is held at a portfolio level because this best reflects the way the business is managed and information is provided to management. The information considered includes:

- the stated policies and objectives for the portfolio and the operation of those policies in practice. In particular, whether management’s strategy focuses on earning contractual interest revenue, maintaining a particular interest rate profile, matching the duration of the financial assets to the duration of the liabilities that are funding those assets or realising cash flows through the sale of the assets;
- how the performance of the portfolio is evaluated and reported to the Bank’s management;
- the risks that affect the performance of the business model (and the financial assets held within that business model) and how those risks are managed;
- how managers of the business are compensated – e.g. whether compensation is based on the fair value of the assets managed or the contractual cash flows collected; and
- the frequency, volume and timing of sales in prior periods, the reasons for such sales and its expectations about future sales activity. However, information about sales activity is not considered in isolation, but as part of an overall assessment of how the Bank’s stated objective for managing the financial assets is achieved and how cash flows are realised.

Financial assets that are held for trading or managed and whose performance is evaluated on a fair value basis are measured at FVTPL because they are neither held to collect contractual cash flows nor held both to collect contractual cash flows and to sell financial assets.

### **Assessment whether contractual cash flows are solely payments of principal and interest**

For the purposes of this assessment, ‘principal’ is defined as the fair value of the financial asset on initial recognition. ‘Interest’ is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs (e.g. liquidity risk and administrative costs), as well as profit margin.

In assessing whether the contractual cash flows are solely payments of principal and interest, the Bank considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition. In making the assessment, the Bank considers:

- contingent events that would change the amount and timing of cash flows;
- leverage features;
- prepayment and extension terms;
- terms that limit the Bank’s claim to cash flows from specified assets (e.g. non-recourse asset arrangements); and
- features that modify consideration of the time value of money – e.g. periodical reset of interest rates.

*Non-recourse loans*

In some cases, loans made by the Bank that are secured by collateral of the borrower limit the Bank's claim to cash flows of the underlying collateral (non-recourse loans). The Bank applies judgment in assessing whether the non-recourse loans meet the SPPI criterion. The Bank typically considers the following information when making this judgement:

- whether the contractual arrangement specifically defines the amounts and dates of the cash payments of the loan;
- the fair value of the collateral relative to the amount of the secured financial asset;
- the ability and willingness of the borrower to make contractual payments, notwithstanding a decline in the value of collateral;
- whether the borrower is an individual or a substantive operating entity or is a special-purpose entity;
- the Bank's risk of loss on the asset relative to a full-recourse loan;
- the extent to which the collateral represents all or a substantial portion of the borrower's assets; and
- whether the Bank will benefit from any upside from the underlying assets.

**Reclassification**

Financial assets are not reclassified subsequent to their initial recognition, except in the period after the Bank changes its business model for managing financial assets.

**Financial liabilities**

The Bank classifies its financial liabilities, other than financial guarantees and loan commitments, as measured at amortised cost or FVTPL.

**Reclassification**

Financial liabilities are not reclassified subsequent to their initial recognition.

*ii. Derecognition***Financial assets**

The Bank derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Bank neither transfers nor retains substantially all of the risks and rewards of ownership and it does not retain control of the financial asset.

On derecognition of a financial asset, the difference between the carrying amount of the asset (or the carrying amount allocated to the portion of the asset derecognised) and the sum of (i) the consideration received (including any new asset obtained less any new liability assumed) and (ii) any cumulative gain or loss that had been recognised in other comprehensive income is recognised in profit or loss.

Any cumulative gain/loss recognised in other comprehensive income in respect of equity investment securities designated as at FVOCI is not recognised in profit or loss on derecognition of such securities, as explained in Note 3(e)(i). Any interest in transferred financial assets that qualify for derecognition that is created or retained by the Bank is recognised as a separate asset or liability.

The Bank enters into transactions whereby it transfers assets recognised on its statement of financial position, but retains either all or substantially all of the risks and rewards of the transferred assets or a portion of them. In such cases, the transferred assets are not derecognised. Examples of such transactions are securities lending and sale-and-repurchase transactions.

In transactions in which the Bank neither retains nor transfers substantially all of the risks and rewards of ownership of a financial asset and it retains control over the asset, the Bank continues to recognise the asset to the extent of its continuing involvement, determined by the extent to which it is exposed to changes in the value of the transferred asset.

### **Financial liabilities**

The Bank derecognises a financial liability when its contractual obligations are discharged or cancelled, or expire.

#### ***iii. Repurchase and reverse repurchase agreements***

Securities sold under sale and repurchase (repo) agreements are accounted for as secured financing transactions, with the securities retained in the statement of financial position and the counterparty liability included in amounts payable under repo transactions within borrowings and other balances from banks. The difference between the sale and repurchase prices represents interest expense and is recognised in profit or loss over the term of the repo agreement using the effective interest method.

Securities purchased under agreements to resell (reverse repo) are recorded as amounts receivable under reverse repo transactions within loans to banks. The difference between the purchase and resale prices represents interest income and is recognised in profit or loss over the term of the repo agreement using the effective interest method.

If assets purchased under an agreement to resell are sold to third parties, the obligation to return securities is recorded as a trading liability and measured at fair value.

#### ***iv. Offsetting***

Financial assets and liabilities are offset and the net amount presented in the statement of financial position when, and only when, the Bank currently has a legally enforceable right to set off the recognised amounts and intends either to settle on a net basis or to realise the asset and settle the liability simultaneously. The Bank currently has a legally enforceable right to set off if that right is not contingent on a future event and enforceable both in the normal course of business and in the event of default, insolvency or bankruptcy of the Bank and all counterparties.

#### ***v. Modification of financial assets and financial liabilities***

### **Financial assets**

If the terms of a financial asset are modified, the Bank evaluates whether the cash flows of the modified asset are substantially different. If the cash flows are substantially different (referred to as 'substantial modification'), then the contractual rights to cash flows from the original financial asset are deemed to have expired. In this case, the original financial asset is derecognised and a new financial asset is recognised at fair value plus any eligible transaction costs. Any fees received as part of the modification are accounted for as follows:

- fees that are considered in determining the fair value of the new asset and fees that represent reimbursement of eligible transaction costs are included in the initial measurement of the asset; and
- other fees are included in profit or loss as part of the gain or loss on derecognition.

Changes in cash flows on existing financial assets or financial liabilities are not considered as modification, if they result from existing contractual terms, e.g. changes in interest rates initiated by the Bank due to changes in the CBA key rate, if the loan agreement entitles the Bank to do so.

The Bank performs a quantitative and qualitative evaluation of whether the modification is substantial, i.e. whether the cash flows of the original financial asset and the modified or replaced financial asset are substantially different. The Bank assesses whether the modification is substantial based on quantitative and qualitative factors in the following order: qualitative factors, quantitative factors, combined effect of qualitative and quantitative factors. If the cash flows are substantially different, then the contractual rights to cash flows from the original financial asset deemed to have expired. In making this evaluation the Bank analogizes to the guidance on the derecognition of financial liabilities.

The Bank concludes that the modification is substantial as a result of the following qualitative factors:

- change the currency of the financial asset;
- change in collateral or other credit enhancement
- change of terms of financial asset that lead to non-compliance with the SPPI criterion.

If cash flows are modified when the borrower is in financial difficulties, then the objective of the modification is usually to maximise recovery of the original contractual terms rather than to originate a new asset with substantially different terms. If the Bank plans to modify a financial asset in a way that would result in forgiveness of cash flows, then it first considers whether a portion of the asset should be written off before the modification takes place (see below for write-off policy). This approach impacts the result of the quantitative evaluation and means that the derecognition criteria are not usually met in such cases. The Bank further performs qualitative evaluation of whether the modification is substantial.

If the modification of a financial asset measured at amortised cost or FVOCI does not result in derecognition of the financial asset, then the Bank first recalculates the gross carrying amount of the financial asset using the original effective interest rate of the asset and recognises the resulting adjustment as a modification gain or loss in profit or loss. For floating-rate financial assets, the original effective interest rate used to calculate the modification gain or loss is adjusted to reflect current market terms at the time of the modification. Any costs or fees incurred and fees received as part of the modification adjust the gross carrying amount of the modified financial asset and are amortised over the remaining term of the modified financial asset.

If such a modification is carried out because of financial difficulties of the borrower, then the gain or loss is presented together with impairment losses. In other cases, it is presented as interest income calculated using the effective interest method.

For fixed-rate loans, where the borrower has an option to prepay the loan at par without significant penalty, the Bank treats the modification of an interest rate to a current market rate using the guidance on floating-rate financial instruments. This means that the effective interest rate is adjusted prospectively.

### **Financial liabilities**

The Bank derecognises a financial liability when its terms are modified and the cash flows of the modified liability are substantially different. In this case, a new financial liability based on the modified terms is recognised at fair value. The difference between the carrying amount of the financial liability extinguished and the new financial liability with modified terms is recognised in profit or loss. Consideration paid includes non-financial assets transferred, if any, and the assumption of liabilities, including the new modified financial liability.

Bank performs a quantitative and qualitative evaluation of whether the modification is substantial considering qualitative factors, quantitative factors and combined effect of qualitative and quantitative factors. The Bank concludes that the modification is substantial as a result of the following qualitative factors:

- change the currency of the financial liability;
- change in collateral or other credit enhancement;
- inclusion of conversion option;
- change in the subordination of the financial liability.

For the quantitative assessment the terms are substantially different if the discounted present value of the cash flows under the new terms, including any fees paid net of any fees received and discounted using the original effective interest rate, is at least 10 per cent different from the discounted present value of the remaining cash flows of the original financial liability.

If the modification of a financial liability is not accounted for as derecognition, then the amortised cost of the liability is recalculated by discounting the modified cash flows at the original effective interest rate and the resulting gain or loss is recognised in profit or loss. For floating-rate financial liabilities, the original effective interest rate used to calculate the modification gain or loss is adjusted to reflect current market terms at the time of the modification. Any costs and fees incurred are recognised as an adjustment to the carrying amount of the liability and amortised over the remaining term of the modified financial liability by re-computing the effective interest rate on the instrument.

#### **vi. Impairment**

See also Note 25(b).

The Bank recognises loss allowances for expected credit losses (ECL) on the following financial instruments that are not measured at FVTPL:

- financial assets that are debt instruments;
- financial guarantee contracts issued; and
- loan commitments issued.

No impairment loss is recognised on equity investments.

The Bank measures loss allowances at an amount equal to lifetime ECL, except for the following, for which they are measured as 12-month ECL:

- debt investment securities that are determined to have low credit risk at the reporting date; and
- other financial instruments on which credit risk has not increased significantly since their initial recognition (see Note 25(b)).

The Bank does not apply the low credit risk exemption to any financial instruments.

12-month ECL are the portion of ECL that result from default events on a financial instrument that are possible within the 12 months after the reporting date. Financial instruments for which a 12-month ECL is recognised are referred to as ‘Stage 1’ financial instruments.

Lifetime ECLs are the ECLs that result from all possible default events over the expected life of the financial instrument. Financial instruments for which a lifetime ECL is recognised are referred to as ‘Stage 2’ financial instruments. Financial instruments allocated to Stage 2 are those that have experienced a significant increase in credit risk since initial recognition but are not credit-impaired. Financial instruments for which lifetime ECL are recognised and that are credit-impaired are referred to as ‘Stage 3’ financial instruments.

## Measurement of ECL

ECL are a probability-weighted estimate of credit losses. They are measured as follows:

- *financial assets that are not credit-impaired at the reporting date*: as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the entity in accordance with the contract and the cash flows that the Bank expects to receive);
- *financial assets that are credit-impaired at the reporting date*: as the difference between the gross carrying amount and the present value of estimated future cash flows;
- *undrawn loan commitments*: as the present value of the difference between the contractual cash flows that are due to the Bank if the commitment is drawn down and the cash flows that the Bank expects to receive; and
- *financial guarantee contracts*: the present value of expected payments to reimburse the holder less any amounts that the Bank expects to recover.

See also Note 25(b).

## Restructured financial assets

If the terms of a financial asset are renegotiated or modified or an existing financial asset is replaced with a new one due to financial difficulties of the borrower, then an assessment is made of whether the financial asset should be derecognised (see Note 3(e)(ii)) and ECL are measured as follows.

- If the expected restructuring will not result in derecognition of the existing asset, then the expected cash flows arising from the modified financial asset are included in calculating the cash shortfalls from the existing asset (see Note 25(b)).
- If the expected restructuring will result in derecognition of the existing asset, then the expected fair value of the new asset is treated as the final cash flow from the existing financial asset at the time of its derecognition. This amount is included in calculating the cash shortfalls from the existing financial asset that are discounted from the expected date of derecognition to the reporting date using the original effective interest rate of the existing financial asset.

## Credit-impaired financial assets

At each reporting date, the Bank assesses whether financial assets carried at amortised cost and debt financial assets carried at FVOCI are credit-impaired (referred to as ‘Stage 3 financial assets’). A financial asset is ‘credit-impaired’ when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred.

Evidence that a financial asset is credit-impaired includes the following observable data:

- significant financial difficulty of the borrower or issuer;
- a breach of contract such as a default or past due event;
- the restructuring of a loan or advance by the Bank on terms that the Bank would not consider otherwise;
- it is becoming probable that the borrower will enter bankruptcy or other financial reorganisation; or
- the disappearance of an active market for a security because of financial difficulties.

A loan that has been renegotiated due to a deterioration in the borrower’s condition is usually considered to be credit-impaired unless there is evidence that the risk of not receiving contractual cash flows has reduced significantly and there are no other indicators of impairment. In addition, a retail loan that is overdue for 90 days or more is considered credit-impaired.

In making an assessment of whether an investment in sovereign debt is credit-impaired, the Bank considers the following factors.

- The market’s assessment of creditworthiness as reflected in the bond yields.
- The rating agencies’ assessments of creditworthiness.
- The country’s ability to access the capital markets for new debt issuance.
- The probability of debt being restructured, resulting in holders suffering losses through voluntary or mandatory debt forgiveness.
- The international support mechanisms in place to provide the necessary support as ‘lender of last resort’ to that country, as well as the intention, reflected in public statements, of governments and agencies to use those mechanisms. This includes an assessment of the depth of those mechanisms and, irrespective of the political intent, whether there is the capacity to fulfil the required criteria.

### **Presentation of allowance for ECL in the statement of financial position**

Loss allowances for ECL are presented in the statement of financial position as follows:

- *financial assets measured at amortised cost*: as a deduction from the gross carrying amount of the assets;
- *loan commitments and financial guarantee contracts*: generally, as a provision;
- *where a financial instrument includes both a drawn and an undrawn component, and the Bank cannot identify the ECL on the loan commitment component separately from those on the drawn component*: the Bank presents a combined loss allowance for both components. The combined amount is presented as a deduction from the gross carrying amount of the drawn component. Any excess of the loss allowance over the gross amount of the drawn component is presented as a provision; and
- *debt instruments measured at FVOCI*: no loss allowance is recognised in the statement of financial position because the carrying amount of these assets is their fair value. However, the loss allowance is recognised in the fair value reserve.

### **Write-offs**

Loans and debt securities are written off (either partially or in full) when there is no reasonable expectation of recovering a financial asset in its entirety or a portion thereof. This is generally the case when the Bank determines that the borrower does not have assets or sources of income that could generate sufficient cash flows to repay the amounts subject to the write-off. This assessment is carried out at the individual asset level.

Recoveries of amounts previously written off are included in ‘impairment losses on financial instruments’ in the statement of profit or loss and other comprehensive income.

Financial assets that are written off could still be subject to enforcement activities in order to comply with the Bank’s procedures for recovery of amounts due.

### **Non-integral financial guarantee contracts**

The Bank assesses whether a financial guarantee contract held is an integral element of a financial asset that is accounted for as a component of that instrument or is a contract that is accounted for separately. The factors that the Bank considers when making this assessment include whether:

- the guarantee is implicitly part of the contractual terms of the debt instrument;
- the guarantee is entered into at the same time as and in contemplation of the debt instrument; and
- the guarantee is given by the parent of the borrower or another company within the borrower’s group.

If the Bank determines that the guarantee is an integral element of the financial asset, then any premium payable in connection with the initial recognition of the financial asset is treated as a transaction cost of acquiring it. The Bank considers the effect of the protection when measuring the fair value of the debt instrument and when measuring ECL.

If the Bank determines that the guarantee is not an integral element of the debt instrument, then it recognises an asset representing any prepayment of guarantee premium and a right to compensation for credit losses. A prepaid premium asset is recognised only if the guaranteed exposure neither is credit-impaired nor has undergone a significant increase in credit risk when the guarantee is acquired. These assets are recognised in 'other assets'. The Bank presents gains or losses on a compensation right in profit or loss in the line item 'impairment losses on debt financial assets'.

**(f) Loans to customers**

'Loans to customers' caption in the statement of financial position include loans to customers measured at amortised cost (see Note 3(e)(i)); they are initially measured at fair value plus incremental direct transaction costs, and subsequently at their amortised cost using the effective interest method.

**(g) Investment securities**

The 'investment securities' caption in the statement of financial position includes:

- debt investment securities measured at amortised cost (see Note 3(e)(i)); these are initially measured at fair value plus incremental direct transaction costs, and subsequently at their amortised cost using the effective interest method;
- debt securities measured at FVOCI (see Note 3(e)(i));
- equity investment securities at FVTPL (see Note 3(e)(i)); and
- equity investment securities designated as at FVOCI (see Note 3(e)(i)).

**(h) Deposits, debt securities issued and loans from banks and other financial institutions**

Deposits, debt securities issued and loans from banks and other financial institutions are initially measured at fair value minus incremental direct transaction costs, and subsequently measured at their amortised cost using the effective interest method, except where the Bank designates liabilities at FVTPL.

**(i) Financial guarantees and loan commitments**

Financial guarantees are contracts that require the Bank to make specified payments to reimburse the holder for a loss that it incurs because a specified debtor fails to make payment when it is due in accordance with the terms of a debt instrument. Loan commitments are firm commitments to provide credit under pre-specified terms and conditions.

Financial guarantees issued or commitments to provide a loan at a below-market interest rate are initially measured at fair value. Subsequently, they are measured at the higher of the loss allowance determined in accordance with IFRS 9 (see Note 3(e)(vi)) and the amount initially recognised less, when appropriate, the cumulative amount of income recognised in accordance with the principles of IFRS 15.

The Bank has issued no loan commitments that are measured at FVTPL.

For other loan commitments the Bank recognises a loss allowance (see Note 3(e)(vi)) in accordance with IFRS 9.

Liabilities arising from financial guarantees and loan commitments are included within provisions.

**(j) Property and equipment****(i) Owned assets**

Items of property and equipment are stated at cost less accumulated depreciation and impairment losses, except for buildings, which are stated at revalued amounts as described below.

Where an item of property and equipment comprises major components having different useful lives, they are accounted for as separate items of property and equipment.

**(ii) Revaluation**

Buildings are subject to revaluation on a regular basis. The frequency of revaluation depends on the movements in the fair values of the buildings being revalued. A revaluation increase on a building is recognised as other comprehensive income except to the extent that it reverses a previous revaluation decrease recognised in profit or loss, in which case it is recognised in profit or loss. A revaluation decrease on a building is recognised in profit or loss except to the extent that it reverses a previous revaluation increase recognised as other comprehensive income directly in equity, in which case it is recognised in other comprehensive income.

**(iii) Depreciation**

Depreciation is charged to profit or loss on a straight-line basis over the estimated useful lives of the individual assets. Depreciation commences on the date of acquisition or, in respect of internally constructed assets, from the time an asset is completed and ready for use. Land is not depreciated. The estimated useful lives are as follows:

- buildings	50 years
- leasehold improvements	20 years
- computers and communication equipment	4-10 years
- motor vehicles	10 years
- fixtures and fittings	10 years

**(k) Intangible assets**

Acquired intangible assets are stated at cost less accumulated amortisation and impairment losses.

Acquired computer software licenses are capitalised on the basis of the costs incurred to acquire and bring to use the specific software.

Amortisation is charged to profit or loss on a straight-line basis over the estimated useful lives of intangible assets. The estimated useful lives are 3 to 10 years.

**(l) Repossessed assets**

The Bank recognizes repossessed assets in the statement of financial position when it has the full and final settlement rights to the collateral.

Repossessed assets are measured at the lower of the carrying amount and the fair value less costs to sell. At initial recognition repossessed assets are measured based on the carrying value of the defaulted loan, including expenditure incurred in the process of collateral foreclosure. Fair value less costs to sell is the estimated selling price of the collateral in the ordinary course of business, less the related selling costs. Subsequent to initial recognition, repossessed assets are reviewed for held for sale classification criteria and are reclassified accordingly when the criteria are met.

Gains and losses on disposal of repossessed assets are recognised net in “other operating income” in profit or loss.

**(m) Impairment of non-financial assets**

Other non-financial assets, other than deferred taxes, are assessed at each reporting date for any indications of impairment. The recoverable amount of non-financial assets is the greater of their fair value less costs to sell and value in use.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. For an asset that does not generate cash inflows largely independent of those from other assets, the recoverable amount is determined for the cash-generating unit to which the asset belongs. An impairment loss is recognised when the carrying amount of an asset or its cash-generating unit exceeds its recoverable amount.

All impairment losses in respect of non-financial assets are recognised in profit or loss and reversed only if there has been a change in the estimates used to determine the recoverable amount. Any impairment loss reversed is only reversed to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

**(n) Provisions**

A provision is recognised in the statement of financial position when the Bank has a legal or constructive obligation as a result of a past event, and it is probable that an outflow of economic benefits will be required to settle the obligation. If the effect is material, provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and, where appropriate, the risks specific to the liability.

**(o) Share capital****(i) Ordinary shares**

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of ordinary shares and share options are recognised as a deduction from equity, net of any tax effects.

**(ii) Share premium**

Amount paid in excess of par value of shares issued is recognised as a share premium.

**(iii) Dividends**

The ability of the Bank to declare and pay dividends is subject to the rules and regulations of Armenian legislation.

Dividends in relation to ordinary shares are reflected as an appropriation of retained earnings in the period when they are declared.

**(p) Taxation**

Income tax comprises current and deferred tax. Income tax is recognised in profit or loss except to the extent that it relates to items of other comprehensive income or transactions with shareholders recognised directly in equity, in which case it is recognised within other comprehensive income or directly within equity.

**(i) Current tax**

Current tax expense is the expected tax payable on the taxable income for the year, using tax rates enacted or substantially enacted at the reporting date, and any adjustment to tax payable in respect of previous years.

**(ii) Deferred tax**

Deferred tax is recognised in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax is not recognised for the temporary differences on the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit or loss.

Deferred tax assets are recognised for unused tax losses, unused tax credits and deductible temporary differences to the extent that it is probable that future taxable profits will be available against which they can be used. Future taxable profits are determined based on the reversal of relevant taxable temporary differences. If the amount of taxable temporary differences is insufficient to recognise a deferred tax asset in full, then future taxable profits, adjusted for reversals of existing temporary differences, are considered, based on the business plans of the Bank. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised; such reductions are reversed when the probability of future taxable profits improves.

Unrecognised deferred tax assets are reassessed at each reporting date and recognised to the extent that it has become probable that future taxable profits will be available against which they can be used.

Deferred tax is measured at the tax rates that are expected to be applied to the temporary differences when they reverse, based on the laws that have been enacted or substantively enacted by the reporting date.

The measurement of deferred tax reflects the tax consequences that would follow the manner in which the Bank expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

**(q) Segment reporting**

An operating segment is a component of a Bank that engages in business activities from which it may earn revenues and incur expenses (including revenues and expenses related to transactions with other components of the same Bank); whose operating results are regularly reviewed by the chief operating decision maker to make decisions about resources to be allocated to the segment and assess its performance, and for which discrete financial information is available. Management considers that the Bank comprises of one operating segment.

**(r) Leases**

At inception of a contract, the Bank assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Bank uses the definition of a lease in IFRS 16.

**(i) As a lessee**

At commencement or on modification of a contract that contains a lease component, the Bank allocates the consideration in the contract to each lease component on the basis of its relative stand-alone prices.

The Bank recognises a right-of-use asset and a lease liability at the lease commencement date. The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received.

The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the end of the lease term, unless the lease transfers ownership of the underlying asset to the Bank by the end of the lease term or the cost of the right-of-use asset reflects that the Bank will exercise a purchase option. In that case the right-of-use asset will be depreciated over the useful life of the underlying asset, which is determined on the same basis as those of property and equipment. In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain remeasurements of the lease liability.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Bank's incremental borrowing rate. Generally, the Bank uses its incremental borrowing rate as the discount rate.

The Bank determines its incremental borrowing rate by obtaining interest rates from various external financing sources and makes certain adjustments to reflect the terms of the lease and type of the asset leased.

Lease payments included in the measurement of the lease liability comprise the following:

- fixed payments, including in-substance fixed payments;
- variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date;
- amounts expected to be payable under a residual value guarantee; and
- the exercise price under a purchase option that the Bank is reasonably certain to exercise, lease payments in an optional renewal period if the Bank is reasonably certain to exercise an extension option, and penalties for early termination of a lease unless the Bank is reasonably certain not to terminate early.

The lease liability is measured at amortised cost using the effective interest method. It is remeasured when there is a change in future lease payments arising from a change in an index or rate, if there is a change in the Bank's estimate of the amount expected to be payable under a residual value guarantee, if the Bank changes its assessment of whether it will exercise a purchase, extension or termination option or if there is a revised in-substance fixed lease payment.

When the lease liability is remeasured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset, or is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

The Bank presents right-of-use assets that do not meet the definition of investment property in 'property, plant and equipment' and lease liabilities in 'other liabilities' in the statement of financial position.

The Bank has elected not to recognise right-of-use assets and lease liabilities for leases of low-value assets and short-term leases, including ATMs. The Bank recognises the lease payments associated with these leases as an expense on a straight-line basis over the lease term.

#### (s) Standards issued but not yet effective

A number of new standards are effective for annual periods beginning after 1 January 2021 and earlier application is permitted; however, the Bank has not early adopted the new or amended standards in preparing these financial statements.

The following new and amended standards are not expected to have a significant impact on the Bank's financial statements.

- Onerous contracts – Cost of Fulfilling a Contract (Amendments to IAS 37).
- Deferred Tax related to Assets and Liabilities arising from a Single Transaction (Amendments to IAS 12).
- COVID-19-Related Rent Concessions beyond 30 June 2021 (Amendment to IFRS 16).
- Annual Improvements to IFRS Standards 2018–2020.
- Property, Plant and Equipment: Proceeds before Intended Use (Amendments to IAS 16).
- Reference to Conceptual Framework (Amendments to IFRS 3).
- Classification of Liabilities as Current or Non-current (Amendments to IAS 1).
- IFRS 17 *Insurance Contracts and amendments to IFRS 17 Insurance Contracts*.
- Disclosure of Accounting Policies (Amendments to IAS 1 and IFRS Practice Statement 2).
- Definition of Accounting Estimates (Amendments to IAS 8).

## 5 Net interest income

<b>Balance at 31 December</b>	<b>(359,420)</b>	<b>(107,129)</b>	<b>(576,476)</b>	<b>(1,043,025)</b>

\* The loss allowance in these tables includes ECL on loan commitments for certain corporate products, retail products such as credit cards and overdrafts.

Significant changes in the gross carrying amount of retail and corporate portfolios during the year ended 31 December 2021 that contributed to changes in loss allowance are presented in Note 15(a).

AMD'000	2021			
	Stage 1	Stage 2	Stage 3	Total
<b>Other financial assets at amortised cost</b>				
Balance at 1 January	(12,861)	-	(302,697)	(315,558)
Transfer to Stage 3	-	-	-	-
Net remeasurement of loss allowance	12,861	-	115,629	128,490
New financial assets originated or purchased	(34,268)	-	-	(34,268)
Write-offs	-	-	163,636	163,636
<b>Balance at 31 December</b>	<b>(34,268)</b>	<b>-</b>	<b>(23,432)</b>	<b>(57,700)</b>

The following tables show reconciliations from the opening to the closing balances of the loss allowance for 2020.

AMD'000	2020*			
	Stage 1	Stage 2	Stage 3	Total
<b>Loans to customers at amortised cost – corporate customers</b>				
Balance at 1 January	(147,480)	(4,056)	(9,826,711)	(9,978,247)
Transfer to Stage 1	-	-	-	-
Transfer to Stage 2	276	(11,454)	11,178	-
Transfer to Stage 3	246	681	(927)	-
Net remeasurement of loss allowance	46,131	2,384	(1,340,167)	(1,291,652)
New financial assets originated or purchased	(84,209)	-	-	(84,209)
Write-offs	-	-	681,475	681,475
<b>Balance at 31 December</b>	<b>(185,036)</b>	<b>(12,445)</b>	<b>(10,475,152)</b>	<b>(10,672,633)</b>

The most significant transfer during the year represented transfer of loans to corporate customers with gross balance of AMD 502,978 thousand from Stage 1 to Stage 2 following the COVID-19 pandemic. The ECL was not significantly affected due to high collateralisation of those loans.

AMD'000	2020*			
	Stage 1	Stage 2	Stage 3	Total
<b>Loans to customers at amortised cost – retail customers</b>				
Balance at 1 January	(262,949)	(30,084)	(614,640)	(907,673)

New financial assets originated or purchased	(6,186)	-	(114,482)	(120,668)
<b>Balance at 31 December</b>	<b>(12,861)</b>	<b>-</b>	<b>(302,697)</b>	<b>(315,558)</b>

## 10 Other general administrative expenses

	2021 AMD'000	2020 AMD'000
Depreciation and amortization*	1,141,196	962,669
Non-refundable taxes and duties	416,251	342,064
Advertising and marketing	260,368	482,535
Communications and information services	253,330	146,291
Professional services	240,198	283,229
Office and utility expenses	190,164	183,722
Repairs and maintenance	161,637	168,732
Rent expenses	139,513	36,951
Insurance	115,898	78,956
Security	96,610	87,762
Representation and organizational expenses	96,212	58,720
Other	92,177	85,607
	<b>3,203,554</b>	<b>2,917,238</b>

\* Included in depreciation and amortization for the year ended 31 December 2021 is AMD 231,755 thousand (2020: AMD 226,929 thousand) related to amortisation of right-of-use asset under IFRS 16 *Leases* requirements, see Note 17.

## 11 Income tax expense

	2021 AMD'000	2020 AMD'000
Current tax expense	659,455	803,114
Movement in deferred tax assets and liabilities due to origination and reversal of temporary differences	(158,589)	(277,500)
<b>Total income tax expense</b>	<b>500,866</b>	<b>525,614</b>

In 2021 the applicable tax rate for current tax is 18 % (2020: 18%).

### Reconciliation of effective tax rate for the year ended 31 December:

	2021 AMD'000	%	2020 AMD'000	%
Profit before income tax	2,042,889		1,697,076	
Income tax at the applicable tax rate	367,720	18.0	305,474	18.0
Non-deductible expenses	133,146	7.0	220,140	13.0
	<b>500,866</b>	<b>25</b>	<b>525,614</b>	<b>31.0</b>

**(a) Deferred tax assets and liabilities**

Temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes give rise to net deferred tax liabilities as at 31 December 2021 and 2020.

Movements in temporary differences during the years ended 31 December 2021 and 2020 are presented as follows:

<b>AMD'000</b>	<b>Balance 1 January 2021</b>	<b>Recognised in profit or loss</b>	<b>Recognised in other comprehensive income</b>	<b>Balance 31 December 2021</b>
Cash and cash equivalents	1,160		-	1,160
Investment securities	(105,790)	(6,653)	28,551	(83,892)
Loans and advances to banks and other financial institutions	(10,083)	12,060	-	1,977
Loans to customers	(986,395)	117,831	-	(868,564)
Property, equipment and intangible assets	(14,059)	444	-	(13,615)

**(b) Income tax recognised in other comprehensive income**

The tax effects related to components of other comprehensive income for the years ended 31 December 2021 and 2020 comprise the following:

	2021			2020		
	Amount before tax	Tax expense	Amount net-of-tax	Amount before tax	Tax expense	Amount net-of-tax
<b>AMD'000</b>						
Net change in fair value of investment securities at FVOCI	(137,139)	24,685	(112,454)	740,685	(133,324)	607,361
Net change in fair value of investment securities at FVOCI transferred to profit or loss	(21,480)	3,866	(17,614)	(1,299,081)	233,835	(1,065,246)
<b>Other comprehensive (loss)/income</b>	<b>(158,619)</b>	<b>28,551</b>	<b>(130,068)</b>	<b>(558,396)</b>	<b>100,511</b>	<b>(457,885)</b>

**12 Cash and cash equivalents**

	2021 AMD'000	2020 AMD'000
<b>Cash on hand</b>	6,086,245	6,789,095
<b>Nostro accounts with the CBA</b>	11,636,238	9,742,840
<b>Nostro accounts with other banks</b>		
- rated from A- to A+	2,720	14,490
- rated from BBB- to BBB+	1,086,325	22,013
- rated from BB- to BB+	400,832	415,653
- rated from B- to B+	478,204	43,568
- not rated	19,489	196,403
<b>Total nostro accounts with other banks</b>	<b>1,987,570</b>	<b>692,127</b>
<b>Total gross cash and cash equivalents</b>	<b>19,710,053</b>	<b>17,224,062</b>
Credit loss allowance	(3,469)	(6,447)
<b>Total net cash and cash equivalents</b>	<b>19,706,584</b>	<b>17,217,615</b>

Ratings are based on Standard & Poor's rating system. No cash and cash equivalents are credit impaired or past due.

As at 31 December 2021 the Bank has no bank except for CBA (2020: no bank except for the CBA) whose balances exceeded 10% of the equity.

Cash and cash equivalents are fully in Stage 1 and measured at amortised cost as at 31 December 2021 and 31 December 2020.

## 13 Investment securities

### (a) Investment securities measured at fair value through other comprehensive income

	2021 AMD'000	2020 AMD'000
<b>Held by the Bank</b>		
<b>Debt and other fixed-income instruments</b>		
– Government securities of the Republic of Armenia	3,615,947	4,048,272

The Bank uses credit ratings per Standard & Poor's in disclosing credit quality.

The Bank has transactions to sell securities under agreements to repurchase and to purchase securities under agreements to resell.

The securities sold under agreements to repurchase are transferred to a third party and the Bank receives cash in exchange. These financial assets may be repledged or resold by counterparties in the absence of default by the Bank, but the counterparty has an obligation to return the securities at the maturity of the contract. The Bank has determined that it retains substantially all the risks and rewards of these securities and therefore has not derecognised them. The cash received is recognised as a financial asset and a financial liability is recognised for the obligation to repay the purchase price for this collateral, and is included in amounts payable under repurchase agreements (Note 20).

These transactions are conducted under terms that are usual and customary to standard lending, and securities borrowing and lending activities.

## 14 Loans and advances to banks and other financial institutions

	2021 AMD'000	2020 AMD'000
<b>Due from the CBA</b>		
Credit card settlement deposit with the CBA	1,376,500	733,500

Credit loss allowance	(96,763)	(42,299)
<b>Total net loans and advances to banks and other financial institutions</b>	<b>12,446,803</b>	<b>17,819,238</b>

### (a) Balances with the CBA

The credit card settlement deposit with the CBA is a non-interest bearing deposit calculated in accordance with regulations issued by the CBA and whose withdrawability is restricted.

Banks are required to maintain cash deposit (obligatory reserve) with the Central Bank of Armenia for attracted funds. For funds attracted in AMD the obligatory reserve is 4% (2020: 4%) and is maintained fully in AMD. For funds attracted in foreign currencies, the reserve is 18% of the attracted funds, of which 8% is maintained in AMD and 10% in the respective currency of funds attracted (2020: 10% maintained in AMD and 8% in the respective currency of attracted funds). The Bank's ability to withdraw deposit maintained in AMD is not restricted by the statutory legislation; however, if the Bank fails to comply with minimum average monthly amount of reserve sanctions may be applied. Obligatory reserves maintained in AMD are classified as cash and cash equivalents (see Note 11) as these funds are readily available for withdrawal.

For the obligatory reserve maintained in foreign currencies the Bank is required to maintain a minimum balance at the end of each day. These reserves are not considered cash and cash equivalents and are included in loans and advances to banks and financial institutions.

**(b) Concentration of loans and advances to banks and other financial institutions**

As at 31 December 2021 the Bank has no counterparty (2020: one bank), whose balance exceeded 10% of equity. The gross value of the balance as at 31 December 2020 is AMD 5,868,225 thousand.

**(c) Credit quality of loans and advances to banks and financial institutions**

Management estimates that as at 31 December 2021 the unrated instruments amounting AMD 3,783,649 thousand approximate rating of B- to B+ under Standard & Poor's rating system and the unrated instruments amounting AMD 2,879,326 thousand approximate rating of CCC- to CCC+ under Standard & Poor's rating system (2020: unrated instruments amounting AMD 11,901,767 thousand approximate rating of B- to B+ under Standard & Poor's rating system).

Loans and advances to banks and other financial institutions are fully in Stage 1 and measured at amortised cost as at 31 December 2021 and 2020. No loans and advances to banks and other financial institutions are credit impaired or past due.

The Bank uses credit ratings per Standard & Poor's in disclosing credit quality.

## 15 Amounts receivable under reverse repurchase agreements

	2021 AMD'000	2020 AMD'000
Amounts receivable from local financial institutions	6,082,288	6,045,468
<b>Total gross amounts receivable under reverse repurchase agreements</b>	<b>6,082,288</b>	<b>6,045,468</b>
Credit loss allowance	(6,216)	(6,261)
<b>Total net amounts receivable under reverse repurchase agreements</b>	<b>6,076,072</b>	<b>6,039,207</b>

As at 31 December 2021 and 2020 the Bank has no amounts receivable under reverse repurchase agreements, whose balances exceeded 10% of equity.

Amounts receivable under reverse repurchase agreements are from nonrated reputable local financial institutions. All of them are categorized under Stage 1 and are measured at amortised cost as at 31 December 2021 and 2020. No amounts receivable under reverse repurchase agreements are credit impaired or past due.

Management estimates that as at 31 December 2021 the unrated amounts receivable under reverse repurchase agreements amounting AMD 6,082,288 thousand (2020: AMD 6,045,468 thousand) approximate rating of B- to B+ under Standard & Poor's rating system.

**(a) Collateral accepted as security for assets**

As at 31 December 2021 the fair value of financial assets (Government securities of the Republic of Armenia) collateralizing reverse repurchase agreements is AMD 6,646,597 thousand (2020: AMD 7,026,359 thousand).

These transactions are conducted under terms that are usual and customary to standard lending, and securities borrowing and lending activities.

\* The loss allowance in this table includes ECL on loan commitments for certain corporate products, retail products such as credit cards and overdrafts.

\*\* Management estimates that as at 31 December 2020 from the unrated gross loans to large corporate customers AMD 15,916,719 thousand approximates to B+ rating, AMD 11,542,109 thousand approximates to B rating under Standard & Poor's rating system .

## (b) Key assumptions and judgements for estimating credit loss allowance

Key assumptions and judgements for estimating credit loss allowance is presented in Note 25(b).

**(c) Analysis of collateral and other credit enhancements****(i) Loans to corporate customers**

Loans to corporate customers are subject to individual credit appraisal and impairment testing. The general creditworthiness of a corporate customer tends to be the most relevant indicator of credit quality of the loan extended to it. However, collateral provides additional security and the Bank generally requests corporate borrowers to provide it.

The following tables provides information on collateral and other credit enhancements securing loans to corporate customers, net of impairment, by types of collateral:

31 December 2021	Loans to customers, carrying amount	Fair value of collateral: for collateral assessed as of reporting date	Fair value of collateral: for collateral assessed as of loan inception date
<b>AMD'000</b>			
<b>Loans which are not credit impaired</b>

\* Corporate guarantees are from companies with sound financial performance and management expects that if the underlying loans default guarantors will be able to repay the loans in full.

\*\* Highly liquid assets include deposits from banks and customers in amount of AMD 11,789,370 thousand (2020: AMD 3,032,742 thousand) and corporate bonds in amount of AMD 1,155,648 thousand (2020: AMD 1,068,732 thousand).

\*\*\* The amount of real estate includes an amount of AMD 66,700 thousand (2020: AMD 922,271 thousand), which is not directly pledged with the Bank. However, it secures right which has been pledged with the Bank against loans extended to two borrowers.

The tables above exclude overcollateralisation.

The Bank has loans, for which the fair value of collateral was assessed on the loan inception date and it was not updated for further changes, and loans for which fair value of collateral is not determined. For certain loans the fair value of collateral is updated as at the reporting date. Information on the valuation of collateral is based on when this estimate was made, if any.

For loans secured by multiple types of collateral, collateral that is most relevant for impairment assessment is disclosed. Sureties received from individuals, such as shareholders of SME borrowers, are not considered for impairment assessment purposes. Accordingly, such loans and unsecured portions of partially secured exposures are presented as loans without collateral or other credit enhancement.

The recoverability of loans which are neither past due nor impaired primarily depends on the creditworthiness of borrowers rather than the value of collateral, and the Bank does not necessarily update the valuation of collateral as at each reporting date.

As at 31 December 2021, the balance of cash-covered loans for which no impairment allowance was created because of the collateral, amounted to AMD 7,799,555 thousand (2020: AMD 3,909,967 thousand).

**(ii) Loans to retail customers**

Mortgage loans are secured by the underlying housing real estate. The Bank's policy is to issue mortgage loans with a loan-to-value ratio at the date of loan issuance of a maximum of 80%.

Consumer loans and other retail loans are mainly secured by real estate. The Bank's policy is to issue consumer loans with a loan-to-value ratio at the date of loan issuance of a maximum of 40%.

Express loans with guarantee and without guarantee are mainly unsecured.

Gold secured loans are secured by golden jewelry. The Bank's policy is to issue gold secured loans with a loan-to-value ratio at the date of loan issuance of a maximum of 100%.

Cash covered loans and part of credit lines are secured with highly liquid assets which include deposits, purchased debt securities issued by the Bank and current accounts.

Salary project loans and part of credit lines are mainly unsecured.

**(iii) Repossessed collateral**

As at 31 December 2021 and 31 December 2020, the repossessed collateral comprises mainly real estate.

Balance at 1 January	2,484,925	1,476,007
Additions	1,064,661	1,126,820
Sales	(418,660)	(117,902)
<b>Balance at 31 December</b>	<b>3,130,926</b>	<b>2,484,925</b>

On the date of foreclosure the collateral is measured at the carrying amount of the defaulted loan. Subsequent to foreclosure repossessed assets are measured at cost less impairment losses. Impairment is estimated based on the market approach. The market approach for real estate is based upon an analysis of the results of comparable recent sales of similar assets or announced prices for sale of similar assets, applying a discount of between 10% and 40% depending on the nature and location of the asset for the announced prices for sale.

The Bank's policy is to sell these assets as soon as it is practicable.

**(d) Industry and geographical analysis of the loan portfolio**

Loans are issued to customers that operate in the following economic sectors:

	<b>2021</b>	<b>2020</b>
	<b>AMD'000</b>	<b>AMD'000</b>
Trade and finance	27,054,887	29,733,721
Manufacturing	6,512,723	3,968,121
Construction	5,266,969	5,378,669
Energy	4,278,515	5,331,535
Mining	3,233,427	5,706,623
Hospitality	2,300,394	1,020,819
Service	1,964,185	574,393
Transportation and communication	428,745	447,709
Agriculture, forestry and timber	25,983	31,145
Other	8,517,901	1,659,023
Loans to retail customers	66,700,680	52,779,516
	<b>126,284,409</b>	<b>106,631,274</b>
Credit loss allowance	(9,182,698)	(12,108,714)
	<b>117,101,711</b>	<b>94,522,560</b>

As at 31 December 2021, loans to customers with a gross value of AMD 119,443,561 thousand (2020: AMD 99,496,065 thousand) are issued to customers located within the Republic of Armenia.

**(e) Assets under lien**

As at 31 December 2021, loans to customers with a gross value of AMD 9,543,732 thousand (2020: AMD 2,690,467 thousand) serve as collateral for loans from credit organisations and borrowings from the Central Bank of Armenia (Note 19).

**(f) Significant credit exposures**

As at 31 December 2021, the Bank has two borrowers or groups of connected borrowers (2020: three), whose loan balances exceed 10% of equity. The gross value of these loans as at 31 December 2021 is AMD 16,509,834 thousand (2020: AMD 22,095,098 thousand).

**(g) Loan maturities**

The maturity of the loan portfolio is presented in Note 25(d), which shows the remaining period from the reporting date to the contractual maturity of the loans.

**(a) Revalued assets**

The fair value of the buildings was last determined as at 31 December 2020 based on valuation performed by an independent licensed valuator. The fair value of buildings estimated by independent appraisal approximated the carrying value of buildings.

The management believes that fair value of buildings approximates the carrying amount as at 31 December 2021.

The basis used for the appraisal are the combination of market and income capitalization methods.

The fair value of buildings is categorised into Level 3 of the fair value hierarchy, because of significant unobservable adjustments (coefficients) to observable inputs to the valuation technique used.

The carrying value of buildings as at 31 December 2021, if the buildings would not have been revalued, would be AMD 3,097,959 thousand (2020: AMD 3,172,202 thousand).

## 18 Lease liability/Right of use asset

The Bank leases assets such as customer service centre spaces which typically run for a period of 5 to 10 years. Information about leases for which the Bank is a lessee is presented below:

**(a) Right of use asset**

	<b>2021</b>	<b>2020</b>
	<b>AMD'000</b>	<b>AMD'000</b>
Balance at 1 January	1,493,835	1,606,304

## 25 Share capital and reserves

### (a) Issued capital and share premium

The authorised, issued and outstanding share capital comprises 679,437 ordinary shares (2020: 679,437). All shares have a nominal value of AMD 50,000 (2020: AMD 50,000).

During 2021 no ordinary shares were issued (2020: none). The holders of ordinary shares are entitled to receive dividends as declared from time to time and are entitled to one vote per share at annual and general meetings of the Bank.

**(b) Nature and purpose of reserves****Revaluation surplus for buildings**

The revaluation surplus for buildings comprises the cumulative positive revalued value of buildings, until the assets are derecognised or impaired.

**Fair value reserve for investment securities**

Fair value reserve for investment securities comprises the cumulative net change in the fair value, until the assets are derecognised or impaired.

**(c) Dividends**

Dividends payable are restricted to the maximum retained earnings of the Bank, which are determined according to Armenian legislation.

No dividends were declared in 2021 and 2020.

**26 Risk management****(a) Risk management policies and procedures**

Management of risk is fundamental to the business of banking and forms an essential element of the Bank's operations. The major (significant) risks faced by the Bank are those related to financial risk, market risk, credit risk, liquidity risk, and operational, legal and reputational risks.

The risk management policies aim to identify, analyse and manage the risks faced by the Bank, to set appropriate risk limits and controls, and to continuously monitor risk levels and adherence to limits. Risk management policies and procedures are reviewed regularly to reflect changes in market conditions, products and services offered and emerging best practice. The Bank has developed a system of reporting on significant risks and capital.

The Council has overall responsibility for the oversight of the risk management framework, overseeing the management of key risks and reviewing its risk management policies and procedures as well as approving significantly large exposures.

The Management Board is responsible for monitoring and implementing risk mitigation measures, and ensuring that the Bank operates within established risk parameters. The Head of the Risk Department is responsible for the overall risk management and compliance functions, ensuring the implementation of common principles and methods for identifying, measuring, managing and reporting both financial and non-financial risks. He reports directly to Chairman of the Management Board and indirectly to the Council of the Bank. The Risk Department is not subordinate to, and does not report to, divisions accepting relevant risks.

Credit, market and liquidity risks, both at the portfolio and transactional levels, are managed and controlled through a system of Credit Committees and an Asset and Liability Management Committee (ALCO). In order to facilitate efficient and effective decision-making, the Bank established a hierarchy of credit committees, depending on the type and amount of the exposure.

Both external and internal risk factors are identified and managed throughout the organization. Particular attention is given to identifying the full range of risk factors and determining the level of assurance over current risk mitigation procedures. Apart from the standard credit and market risk analysis, the Risk Department monitors financial and non-financial risks by holding regular meetings with operational units in order to obtain expert judgments in their respective areas of expertise.

In compliance with the Bank's internal documentation the Risk Department and internal audit function frequently prepare reports, which cover the Bank's significant risks management. The reports include observations as to assessment of the effectiveness of the Bank's procedures and methodologies, and recommendations for improvement.

## (b) Financial risk review

This note presents information about the Bank's exposure to financial risks.

### Credit risk

Credit risk is the risk of financial loss to the Bank if a customer or counterparty to a financial instrument fails to meet its contractual obligations. The Bank has policies and procedures in place to manage credit exposures (both for recognised financial assets and unrecognised contractual commitments), including guidelines to limit portfolio concentration and the establishment of a Credit Committee to actively monitor credit risk. The credit policy is reviewed and approved by the Management Board.

The credit policy establishes:

- procedures for reviewing and approving loan credit applications
- methodology for the credit assessment of borrowers (corporate and retail)
- methodology for the credit assessment of counterparties, issuers and insurance companies
- methodology for the evaluation of collateral
- credit documentation requirements
- procedures for the ongoing monitoring of loans and other credit exposures.

Corporate loan credit applications are originated by the relevant client managers and are then passed on to the Loan Department, which is responsible for the corporate loan portfolio. Analysis reports are based on a structured analysis, focusing on the customer's business and financial performance. The loan credit application and the report are then independently reviewed by the Risk Department and a second opinion is given accompanied by a verification that credit policy requirements are met. The Credit Committee reviews the loan credit application on the basis of submissions by the Loan Department and the Risk Department. Individual transactions are also reviewed by the Legal, Accounting and Tax departments, depending on the specific risks and pending final approval of the Credit Committee.

The Bank continuously monitors the performance of individual credit exposures and regularly reassesses the creditworthiness of its customers. The review is based on the customer's most recent financial statements and other information submitted by the borrower, or otherwise obtained by the Bank. Retail loan credit applications are reviewed by the Retail Lending Department through the use of scoring models and application data verification procedures developed together with the Risk Department.

Apart from individual customer analysis, the credit portfolio is assessed by the Risk Department with regard to credit concentration and market risks.

**Credit risk - Amounts arising from ECL****Inputs, assumptions and techniques used for estimating impairment**

See accounting policy in Note 3(e)(vi).

**Significant increase in credit risk**

When determining whether the risk of default on a financial instrument has increased significantly since initial recognition, the Bank considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Bank's historical experience and expert credit assessment and including forward-looking information.

The objective of the assessment is to identify whether a significant increase in credit risk has occurred for an exposure by comparing:

- the remaining lifetime probability of default (PD) as at the reporting date; with
- the remaining lifetime PD for this point in time that was estimated at the time of initial recognition of the exposure (adjusted where relevant for changes in prepayment expectations).

The Bank uses three criteria for determining whether there has been a significant increase in credit risk:

- quantitative test based on movement in probability of default (PD);
- qualitative indicators; and
- backstop of 30 days past due.

The exposures of the Bank's borrowers are subject to ongoing monitoring, which may result in a determination about significant increase in credit risk. The monitoring typically involves use of the following data.

<b>Corporate exposure</b>	<b>All exposures (corporate and retail exposures)</b>
<ul style="list-style-type: none"> <li>– Information obtained during periodic review of customer files – e.g. audited financial statements, management accounts, budgets and projections. Examples of areas of particular focus are: gross profit margins, financial leverage ratios, debt service coverage, compliance with covenants, quality of management, senior management changes</li> </ul>	<ul style="list-style-type: none"> <li>– Payment record – this includes overdue status as well as a range of variables about payment ratios</li> </ul>
<ul style="list-style-type: none"> <li>– Data from credit reference agencies, press articles, changes in external credit ratings</li> </ul>	<ul style="list-style-type: none"> <li>– Utilisation of the granted limit</li> <li>– Requests for and granting of forbearance</li> </ul>
<ul style="list-style-type: none"> <li>– Quoted bond and credit default swap (CDS) prices for the borrower where available</li> </ul>	<ul style="list-style-type: none"> <li>– Existing and forecast changes in business, financial and economic conditions</li> </ul>
<ul style="list-style-type: none"> <li>– Actual and expected significant changes in the political, regulatory and technological environment of the borrower or in its business activities</li> </ul>	

### *Generating the term structure of PD*

Credit risk grades are a primary input into the determination of the term structure of PD for corporate exposures. The Bank collects performance and default information about its credit risk exposures analysed by type of product and borrower as well as by credit risk grading. For some portfolios, information purchased from external credit reference agencies is also used. The Bank sets the maximum level of PDs equal to PD of the country's rating grade where the borrower operates.

Overdue days are primary input into the determination of the term structure of PD for retail exposures in Markov's model of migration matrices. Migration matrices are constructed using historical data over the past 36 months.

### *Determining whether credit risk has increased significantly*

The Bank assesses whether credit risk has increased significantly since initial recognition at each reporting period. Determining whether an increase in credit risk is significant depends on the characteristics of the financial instrument and the borrower, and the geographical region. What is considered significant will differ for different types of lending, in particular between corporate and retail.

The credit risk may also be deemed to have increased significantly since initial recognition based on qualitative factors linked to the Bank's credit risk management processes that may not otherwise be fully reflected in its quantitative analysis on a timely basis. This will be the case for exposures that meet certain heightened risk criteria, such as placement on a watch list. Such qualitative factors are based on its expert judgement and relevant historical experience.

As a backstop, the Bank considers that a significant increase in credit risk occurs no later than when an asset is more than 30 days past due for loans to customers and 1 day for loans and advances to banks and other financial institutions and investment securities. Days past due are determined by counting the number of days since the earliest elapsed due date in respect of which full payment has not been received. Due dates are determined without considering any grace period that might be available to the borrower.

As a general indicator, credit risk of a particular exposure is deemed to have increased significantly since initial recognition if, based on the Bank's quantitative modelling the remaining lifetime PD increased by more than 64%.

If there is evidence that there is no longer a significant increase in credit risk relative to initial recognition, then the loss allowance on an instrument returns to being measured as 12-month ECL. Some qualitative indicators of an increase in credit risk, such as delinquency of forbearance, may be indicative of an increased risk of default that persists after the indicator itself has ceased to exist. In these cases the Bank determines a probation period during which the financial asset is required to demonstrate good behaviour to provide evidence that its credit risk has declined sufficiently. When contractual terms of a loan have been modified, evidence that the criteria for recognising lifetime ECL are no longer met includes history of up-to-date payment performance against the modified contractual terms.

### *Definition of default*

The Bank considers a financial asset to be in default when:

- the borrower is unlikely to pay its credit obligations to the Bank in full, without recourse by the Bank to actions such as realising security (if any is held);

- the borrower is past due more than 90 days for loans to customers and 30 days for loans and advances to banks and other financial institutions and investment securities on any material credit obligation to the Bank. Overdrafts are considered as being past due once the customer has breached an advised limit or been advised of a limit smaller than the current amount outstanding; or
- it is becoming probable that the borrower will restructure the asset as a result of bankruptcy due to the borrower's inability to pay its credit obligations.

In assessing whether a borrower is in default, the Bank considers indicators that are:

- qualitative – e.g. breaches of covenant;
- quantitative – e.g. overdue status and non-payment on another obligation of the same issuer to the Bank; and
- based on data developed internally and obtained from external sources.

Inputs into the assessment of whether a financial instrument is in default and their significance may vary over time to reflect changes in circumstances.

#### *Incorporation of forward-looking information*

The Bank incorporates forward-looking information into both the assessment of whether the credit risk of an instrument has increased significantly since its initial recognition and the measurement of ECL. The Bank uses expert judgment in assessment of forward-looking information.

The Bank has identified and documented key drivers of credit risk and credit losses for each portfolio of financial instruments and, using an analysis of historical data, has estimated relationships between macro-economic variable and credit risk and credit losses. This key driver is GDP. Predicted relationships between the key driver and default and loss rates on various portfolios of financial assets have been developed based on analysing historical data over the past 6 years. As at the reporting date despite the positive assessed impact of FLI under the base macro scenario, ECL has not been adjusted for FLI due to the large variation in macro scenarios given the situation with COVID-19 pandemic, Nagorno-Karabakh conflict, etc.

#### *Modified financial assets*

The contractual terms of a loan may be modified for a number of reasons, including changing market conditions, customer retention and other factors not related to a current or potential credit deterioration of the customer. An existing loan whose terms have been modified may be derecognised and the renegotiated loan recognised as a new loan at fair value in accordance with the accounting policy set out in Note 3(e)(v).

When the terms of a financial asset are modified and the modification does not result in derecognition, the determination of whether the asset's credit risk has increased significantly reflects comparison of:

- its remaining lifetime PD at the reporting date based on the modified terms; with
- the remaining lifetime PD estimated based on data at initial recognition and the original contractual terms.

When modification results in derecognition, a new loan is recognised and allocated to Stage 1 (assuming it is not credit-impaired at that time).

The Bank renegotiates loans to customers in financial difficulties (referred to as 'forbearance activities') to maximise collection opportunities and minimise the risk of default. Under the Bank's forbearance policy, loan forbearance is granted on a selective basis if the debtor is currently in default on its debt or if there is a high risk of default, there is evidence that the debtor made all reasonable efforts to pay under the original contractual terms and the debtor is expected to be able to meet the revised terms.

The revised terms usually include extending the maturity, changing the timing of interest payments and amending the terms of loan covenants. Both retail and corporate loans are subject to the forbearance policy.

For financial assets modified as part of the Bank's forbearance policy, the estimate of PD reflects whether the modification has improved or restored the Bank's ability to collect interest and principal and the Bank's previous experience of similar forbearance action. As part of this process, the Bank evaluates the borrower's payment performance against the modified contractual terms and considers various behavioural indicators.

Generally, forbearance is a qualitative indicator of a significant increase in credit risk and an expectation of forbearance may constitute evidence that an exposure is credit-impaired (see Note 3(e)(iv)). A customer needs to demonstrate consistently good payment behaviour over a period of time before the exposure is no longer considered to be credit-impaired/ in default or the PD is considered to have decreased such that the loss allowance reverts to being measured at an amount equal to 12-month ECL.

#### *Measurement of ECL*

The key inputs into the measurement of ECL are the term structure of the following variables:

- probability of default (PD);
- loss given default (LGD);
- exposure at default (EAD).

ECL for exposures in Stage 1 is calculated by multiplying the 12-month PD by LGD and EAD. Lifetime ECL is calculated by multiplying the lifetime PD by LGD and EAD.

The methodology of estimating PDs is discussed above under the heading "Generating the term structure of PD".

The Bank estimates LGD parameters based on the history of recovery rates of claims against defaulted counterparties. The LGD models consider the structure, collateral, seniority of the claim, counterparty industry and recovery costs of any collateral that is integral to the financial asset. For loans secured by retail property, LTV ratios are a key parameter in determining LGD. LGD estimates are recalibrated for different economic scenarios and, for real estate lending, to reflect possible changes in property prices. They are calculated on a discounted cash flow basis using the effective interest rate as the discounting factor.

EAD represents the expected exposure in the event of a default. The Bank derives the EAD from the current exposure to the counterparty and potential changes to the current amount allowed under the contract and arising from amortisation. The EAD of a financial asset is its gross carrying amount at the time of default. For lending commitments, the EAD is potential future amounts that may be drawn under the contract, which are estimated based on historical observations and forward-looking forecasts. For financial guarantees, the EAD represents the guarantee exposure when the financial guarantee becomes payable.

As described above, and subject to using a maximum of a 12-month PD for Stage 1 financial assets, the Bank measures ECL considering the risk of default over the maximum contractual period (including any borrower's extension options) over which it is exposed to credit risk, even if, for credit risk management purposes, the Bank considers a longer period. The maximum contractual period extends to the date at which the Bank has the right to require repayment of an advance or terminate a loan commitment or guarantee.

Where modelling of a parameter is carried out on a collective basis, the financial instruments are grouped on the basis of shared risk characteristics that include:

- instrument type;
- credit risk gradings;
- collateral type.

The groupings are subject to regular review to ensure that exposures within a particular group remain appropriately homogeneous.

For portfolios in respect of which the Bank has limited historical data, external benchmark information is used to supplement the internally available data. The portfolios for which external benchmark information represents a significant input into measurement of ECL are as follows:

	2021	2020	External benchmarks used	
	AMD'000 Exposure	AMD'000 Exposure	PD	LGD
Investment securities measured at FVOCI	8,059,615	8,190,764	S&P default studies	Moody's recovery studies
Investment securities measured at amortised cost	18,804,988	20,815,911	S&P default studies	Moody's recovery studies
Loans to corporate customers	11,897,919	18,251,332	S&P default studies	Moody's recovery studies
Loans to corporate customers	18,039,287	9,231,744	S&P default studies	-
Loans and advances to banks and other financial institutions	12,543,566	17,861,537	S&P default studies	Moody's recovery studies

### Concentrations of credit risk

The maximum exposure to credit risk is generally reflected in the carrying amounts of financial assets in the statement of financial position and unrecognised contractual commitment amounts. The impact of the possible netting of assets and liabilities to reduce potential credit exposure is not significant.

The maximum exposure to credit risk from financial assets at the reporting date is as follows:

	2021	2020
	AMD'000	AMD'000
<b>ASSETS</b>		
Cash and cash equivalents	13,620,339	10,428,520
Financial instruments measured at fair value through profit or loss	403,975	-
Investment securities measured at fair value through other comprehensive income	8,427,360	8,484,090
Investment securities measured at amortised cost	18,746,983	20,665,862
Loans and advances to banks and other financial institutions	12,446,803	17,819,238
Amounts receivable under reverse repurchase agreements	6,076,072	6,039,207
Loans to customers	117,101,711	94,522,560
Other financial assets	613,677	442,518
<b>Total maximum exposure</b>	<b>177,436,920</b>	<b>158,401,995</b>

Collateral generally is not held against claims under derivative financial instruments, investments in securities, and loans to banks, except when securities are held as part of reverse repurchase and securities borrowing activities.

For the analysis of collateral held against loans to customers and concentration of credit risk in respect of loans to customers, see Note 15.

The maximum exposure to credit risk from unrecognised contractual commitments at the reporting date is presented in Note 27.

### Offsetting financial assets and financial liabilities

The disclosures set out in the tables below include financial assets and financial liabilities that:

- are offset in the Bank’s statement of financial position or
- are subject to an enforceable master netting arrangement or similar agreement that covers similar financial instruments, irrespective of whether they are offset in the statement of financial position.

Similar agreements include derivative clearing agreements, global master repurchase agreements, and global master securities lending agreements. Similar financial instruments include derivatives, sales and repurchase agreements, reverse sale and repurchase agreements, and securities borrowing and lending agreements.

The Bank receives and accepts collateral in the form of cash and marketable securities in respect of sale and repurchase, and reverse sale and repurchase agreements.

Such collateral is subject to the standard industry terms. This means that securities received/given as collateral can be pledged or sold during the term of the transaction, but must be returned on maturity of the transaction. The terms also give each counterparty the right to terminate the related transactions upon the counterparty’s failure to post collateral.

The above arrangements do not meet the offsetting criteria in the statement of financial position. This is because they create a right of set-off of recognised amounts that is enforceable only following an event of default, insolvency or bankruptcy of the Bank or the counterparties.

The table below shows financial assets and financial liabilities subject to offsetting, enforceable master netting arrangements and similar arrangements as at 31 December 2021:

AMD’000

Types of financial assets/liabilities	Gross amounts of recognised financial asset/liability	Gross amount of recognised financial liability/asset offset in the statement of financial position	Net amount of financial assets/liabilities presented in the statement of financial position	Related amounts not offset in the statement of financial position		
				Financial instruments	Cash collateral received	Net amount
Amounts receivable under reverse repurchase agreements	6,082,288	-	6,082,288	(6,082,288)	-	-
<b>Total financial assets</b>	<b>6,082,288</b>	<b>-</b>	<b>6,082,288</b>	<b>(6,082,288)</b>	<b>-</b>	<b>-</b>
Amounts payable under repurchase agreements	13,008,429	-	13,008,429	(13,008,429)	-	-
<b>Total financial liabilities</b>	<b>17,073,549</b>	<b>-</b>	<b>17,073,549</b>	<b>(17,073,549)</b>	<b>-</b>	<b>-</b>

The table below shows financial assets and financial liabilities subject to offsetting, enforceable master netting arrangements and similar arrangements as at 31 December 2020:

## AMD'000

Types of financial assets/liabilities	Gross amounts of recognised financial asset/liability	Gross amount of recognised financial liability/asset offset in the statement of financial position	Net amount of financial assets/liabilities presented in the statement of financial position	Related amounts not offset in the statement of financial position		
				Financial instruments	Cash collateral received	Net amount
Amounts receivable under reverse repurchase agreements	6,045,468	-	6,045,468	(6,045,468)	-	-
<b>Total financial assets</b>	<b>6,045,468</b>	<b>-</b>	<b>6,045,468</b>	<b>(6,045,468)</b>	<b>-</b>	<b>-</b>
Amounts payable under repurchase agreements	(20,785,812)	-	(20,785,812)	16,604,596	-	(4,181,216)
<b>Total financial liabilities</b>	<b>(23,476,562)</b>	<b>-</b>	<b>(23,476,562)</b>	<b>19,295,063</b>	<b>-</b>	<b>(4,181,499)</b>

The gross amounts of financial assets and financial liabilities and their net amounts as presented in the statement of financial position that are disclosed in the above tables are measured in the statement of financial position on the amortised cost basis.

**(c) Market risk**

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises currency risk, interest rate risk and other price risks. Market risk arises from open positions in interest rate and equity financial instruments, which are exposed to general and specific market movements and changes in the level of volatility of market prices and foreign currency rates. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return on risk.

Overall authority for market risk is vested in the ALCO. Market risk limits are approved by the ALCO, based on recommendations of the Risk Department.

The Bank manages its market risk by setting open position limits in relation to financial instruments, interest rate maturity and currency positions and stop-loss limits. These are monitored on a regular basis and reviewed and approved by the Management Board.

**(i) Interest rate risk**

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Bank is exposed to the effects of fluctuations in the prevailing levels of market interest rates on its financial position and cash flows. Interest margins may increase as a result of such changes, but may also reduce or create losses in the event that unexpected movements occur.

**Interest rate gap analysis**

Interest rate risk is managed principally through monitoring interest rate gaps. A summary of the interest gap position for major financial instruments is as follows:

AMD'000	Less than 3 months	3-6 months	6-12 months	1-5 years	More than 5 years	Non-interest bearing	Carrying amount
<b>31 December 2021</b>							
<b>ASSETS</b>							
Cash and cash equivalents	82,564	-	-	-	-	19,624,020	19,706,584
Financial instrument measured at fair value through profit or loss	-	-	-	-	-	403,975	403,975
Investment securities measured at fair value through other comprehensive income	93,709	845,666	282,021	5,429,911	1,408,308	367,745	8,427,360
Investment securities measured at amortised cost	84,147	967,557	991,487	10,084,526	6,619,266	-	18,746,983
Loans and advances to banks and other financial institutions	992,856	2,615,380	1,899,334	976,395	-	5,962,838	12,446,803

Amounts payable under repurchase agreements	7.9%	-	-	5.5%	3.0%	1.0%

**Interest rate sensitivity analysis**

The management of interest rate risk, based on an interest rate gap analysis, is supplemented by monitoring the sensitivity of financial assets and liabilities. An analysis of the sensitivity of net profit or loss and equity (net of taxes) to changes in interest rates (repricing risk), based on a simplified scenario of a 100 basis point (bp) symmetrical fall or rise in all yield curves and positions of interest-bearing assets and liabilities existing as at 31 December 2021 and 2020, is as follows:

	2021	2020
	AMD'000	AMD'000
100 bp parallel fall	164,389	156,464
100 bp parallel rise	(164,389)	(156,464)

An analysis of the sensitivity of equity as a result of changes in the fair value of financial assets measured at FVOCI due to changes in the interest rates, based on positions existing as at 31 December 2021 and 2020 and a simplified scenario of a 100 bp symmetrical fall or rise in all yield curves, is as follows:

	2021	2020
	Equity AMD'000	Equity AMD'000
100 bp parallel fall	267,861	329,999
100 bp parallel rise	(267,861)	(329,999)

## (ii) Currency risk

The Bank has assets and liabilities denominated in several foreign currencies.

Currency risk is the risk that the fair value or the future cash flows of a financial instrument will fluctuate because of changes in foreign currency exchange rates. Although the Bank hedges its exposure to currency risk, such activities do not qualify as hedging relationships in accordance with IFRS.

The following table shows the foreign currency exposure structure of financial assets and liabilities as at 31 December 2021:

	AMD AMD'000	USD AMD'000	EUR AMD'000	Other currencies AMD'000	Total AMD'000
<b>ASSETS</b>

A weakening of the AMD, as indicated below, against the following currencies at 31 December 2021 and 2020, would have increased (decreased) equity and profit or loss by the amounts shown below. This analysis is before taxes, and is based on foreign currency exchange rate variances that the Bank considered to be reasonably possible at the end of the reporting period. The analysis assumes that all other variables, in particular interest rates, remain constant.

	2021 AMD'000	2020 AMD'000
10% appreciation of USD against AMD	691,127	782,246
10% appreciation of EUR against AMD	19,791	(3,099)

A strengthening of the AMD against the above currencies at 31 December 2021 and 2020 would have had the equal but opposite effect on the above currencies to the amounts shown above, on the basis that all other variables remained constant.

**(d) Liquidity risk**

Liquidity risk is the risk that the Bank will encounter difficulty in meeting obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. Liquidity risk exists when the maturities of assets and liabilities do not match. The matching and/or controlled mismatching of the maturities and interest rates of assets and liabilities is fundamental to liquidity management. It is unusual for financial institutions ever to be completely matched, since business transacted is often of an uncertain term and of different types. An unmatched position potentially enhances profitability, but can also increase the risk of losses.

The Bank maintains liquidity management with the objective of ensuring that funds will be available at all times to honour all cash flow obligations as they become due. The liquidity policy is reviewed and approved by the Management Board.

The Bank seeks to actively support a diversified and stable funding base comprising debt securities in issue, long- and short-term loans from other banks, core corporate and retail customer deposits, accompanied by diversified portfolios of highly liquid assets, in order to be able to respond quickly and efficiently to unforeseen liquidity requirements.

The liquidity management policy requires:

- projecting cash flows by major currencies and taking into account the level of liquid assets necessary in relation thereto
- maintaining a diverse range of funding sources
- managing the concentration and profile of debts
- maintaining debt financing plans
- maintaining a portfolio of highly marketable assets that can easily be liquidated as protection against any interruption to cash flow
- maintaining liquidity and funding contingency plans
- monitoring liquidity ratios against regulatory requirements.

The Treasury Department receives information from business units regarding the liquidity profile of their financial assets and liabilities and details of other projected cash flows arising from projected future business. The Treasury Department then provides for an adequate portfolio of short-term liquid assets to be maintained, largely made up of short-term liquid trading securities, loans to banks and other inter-bank facilities, to ensure that sufficient liquidity is maintained within the Bank as a whole.

The daily liquidity position is monitored and regular liquidity stress testing under a variety of scenarios covering both normal and more severe market conditions, is performed by the Treasury Department. Under normal market conditions, liquidity reports covering the liquidity position are presented to senior management on a weekly basis. Decisions on liquidity management are made by the ALCO and implemented by the Treasury Department.

The following tables show the undiscounted cash flows on financial liabilities and credit-related commitments on the basis of their earliest possible contractual maturity. The total gross inflow and outflow disclosed in the tables is the contractual, undiscounted cash flow on the financial liability or credit related commitment.

The maturity analysis for financial liabilities as at 31 December 2021 is as follows:

AMD'000	Demand and less than 1 month	From 1 to 3 months	From 3 to 6 months	From 6 to 12 months	More than 1 year	Total gross amount inflow/ (outflow)	Carrying amount
<b>Non-derivative liabilities</b>							
Deposits and balances from banks and other financial institutions	8,595,928	2,009,519	3,383,500	3,843,507	13,003,874	30,836,328	27,172,892

Under Armenian law, individuals can withdraw their term deposits at any time, forfeiting in most of the cases the accrued interest. These deposits are classified in accordance with their stated maturity dates as follows:

	<b>2021</b>	<b>2020</b>
	<b>AMD'000</b>	<b>AMD'000</b>
Demand and less than 1 month	2,502,479	2,349,133
From 1 to 3 months	7,232,251	6,635,397
From 3 to 6 months	8,898,777	8,696,817
From 6 to 12 months	14,624,179	16,066,818
From 1 to 5 years	5,825,138	3,569,692
More than 5 years	561,511	612,099
	<b>39,644,335</b>	<b>37,929,956</b>

In accordance with term deposit agreements with some corporate customers, the customers can withdraw their term deposits at any time, forfeiting the accrued interest. These deposits are classified in accordance with their stated maturity dates. The classification of these deposits in accordance with their stated maturity dates is presented below:

	<b>2021</b>	<b>2020</b>
	<b>AMD'000</b>	<b>AMD'000</b>
Demand and less than 1 month	23,860	2,826
From 1 to 3 months	755,561	35,285
From 3 to 6 months	554,229	1,159,091
From 6 to 12 months	5,316,190	1,065,813
From 1 to 5 years	5,474,989	439,584
	<b>12,124,829</b>	<b>2,702,599</b>

The table below shows an analysis, by expected maturities, of amounts recognised in the statement of financial position as at 31 December 2021:

AMD'000	Demand and less than 1 month	From 1 to 3 months	From 3 to 12 months	From 1 to 5 years	More than 5 years	No maturity	Overdue*	Total

## 27 Capital management

The CBA sets and monitors capital requirements for the Bank.

The Bank defines as capital those items defined by statutory regulation as capital for commercial banks.

As at 31 December 2021 the minimum level of ratio of capital to risk weighted assets (statutory capital ratio) was 12% (2020:12%). The Bank is in compliance with the statutory capital ratio as at 31 December 2021 and 2020.

The calculation of capital adequacy based on requirements set by the CBA as at 31 December is as follows:

	<b>2021</b> <b>AMD'000</b> <b>Unaudited</b>	<b>2020</b> <b>AMD'000</b> <b>Unaudited</b>
<b>Core capital</b>		
Core capital	41,267,803	39,110,639
Deductions	(4,948,446)	(3,599,948)
<b>Total core capital</b>	<b>36,319,357</b>	<b>35,510,691</b>
<b>Additional capital</b>		
Additional capital	399,517	551,352
<b>Total additional capital</b>	<b>399,517</b>	<b>551,352</b>
<b>Total capital</b>	<b>36,718,874</b>	<b>36,062,043</b>
<b>Total risk weighted assets, combining credit, market and operational risks</b>	<b>151,211,970</b>	<b>130,111,234</b>
<b>Total capital expressed as a percentage of risk-weighted assets (total capital ratio)</b>	<b>24.28%</b>	<b>27.72%</b>

Risk-weighted assets are measured by means of a hierarchy of risk weights classified according to the nature and reflecting an estimate of credit, market and other risks associated with each asset and counterparty, taking into account any eligible collateral or guarantees. A similar treatment is adopted for unrecognised contractual commitments, with some adjustments to reflect the more contingent nature of potential losses.

## 28 Credit related commitments

The Bank has outstanding credit related commitments to extend loans. These credit related commitments take the form of approved loans and credit card limits and overdraft facilities.

The Bank provides financial guarantees and letters of credit to guarantee the performance of customers to third parties. These agreements have fixed limits and generally extend for a period of up to five years.

The Bank applies the same credit risk management policies and procedures when granting credit commitments, financial guarantees and letters of credit as it does for granting loans to customers.

The contractual amounts of credit related commitments are set out in the following table by category. The amounts reflected in the table for credit related commitments assume that amounts are fully advanced. The amounts reflected in the table for guarantees and letters of credit represent the maximum accounting loss that would be recognised at the reporting date if the counterparties failed completely to perform as contracted.

	<b>2021</b>	<b>2020</b>
	<b>AMD'000</b>	<b>AMD'000</b>
<b>Contracted amount</b>		
Credit card commitments	4,027,791	3,648,645
Loan and credit line commitments	3,458,582	3,291,856
Guarantees and letters of credit	1,313,137	394,997
	<b>8,799,510</b>	<b>7,335,498</b>

The total outstanding contractual credit related commitments above do not necessarily represent future cash requirements, as these credit related commitments may expire or terminate without being funded. The majority of loan and credit line commitments do not represent an unconditional credit related commitment by the Bank.

Credit card commitments, loan and credit line commitments are mainly in Stage 1 and measured at amortised cost as at 31 December 2021 and 2020. Credit card commitments, loans and credit line commitments are not credit impaired or past due.

## 29 Contingencies

### (a) Insurance

The insurance industry in the Republic of Armenia is in a developing state and many forms of insurance protection common in other parts of the world are not yet generally available. The Bank has property insurance and Banker's Blanket Bond (BBB) insurance with up to USD 3,000 thousand coverage.

### (b) Litigation

In the ordinary course of business, the Bank is subject to legal actions and complaints. Management believes that the ultimate liability, if any, arising from such actions or complaints will not have a material adverse effect on the financial condition or the results of future operations.

On 4 October 2017 a claim was submitted to the First Instance Court with demand of USD 22,301 thousand from the Bank because of the violation of the agreement concluded between the Bank and one of its clients. After double examinations of the claim in the First Instance Court and successful appellations by the Bank in the Court of Appeals of the Republic of Armenia, on 13 April 2020 the client submitted an appeal to the Cassation Court of Armenia. On 22 September 2020 the Cassation Court of Armenia rejected the cassation appeal and the claim was resolved in favour of the Bank.

**(c) Taxation contingencies**

The taxation system in Armenia is relatively new and is characterised by frequent changes in legislation, official pronouncements and court decisions, which are sometimes unclear, contradictory and subject to varying interpretation. Taxes are subject to review and investigation by tax authorities, which have the authority to impose fines and penalties. In the event of a breach of tax legislation, no liabilities for additional taxes, fines or penalties may be imposed by tax authorities once three years have elapsed from the date of the breach.

These circumstances may create tax risks in Armenia that are more significant than in other countries. Management believes that it has provided adequately for tax liabilities based on its interpretations of applicable Armenian tax legislation, official pronouncements and court decisions. However, the interpretations of the relevant authorities could differ and the effect on these financial statements, if the authorities were successful in enforcing their interpretations, could be significant.

## 30 Related party transactions

**(a) Control relationships**

The Bank's parent company is FISTOCO LTD. The party with ultimate control over the Bank is Mr. Vartan Dilanyan.

No publicly available financial statements are produced by the Bank's parent company.

**(b) Transactions with members of the Council and the Management Board**

Total remuneration included in personnel expenses for the years ended 31 December 2021 and 2020 is as follows:

	2021 AMD'000	2020 AMD'000
Members of the Council of the Bank	28,200	28,021
Members of the Management Board	794,047	446,956
	<b>822,247</b>	<b>474,977</b>

These amounts include cash and non-cash benefits in respect of members of the Council and the Management Board.

The outstanding balances and average effective interest rates as at 31 December 2021 and 2020 for transactions with members of the Council and the Management Board are as follows:

	<b>2021</b>	<b>Average effective</b>	<b>2020</b>	<b>Average effective</b>
	<b>AMD'000</b>	<b>interest rate, %</b>	<b>AMD'000</b>	<b>interest rate, %</b>

Other related parties include transactions with companies under significant influence of Council and Management Board and their close family members.

The majority of balances resulting from transactions with other related parties mature within one year, except debt securities which mature within two years. Transactions with other related parties are not secured.

As at 31 December 2021 the loans with carrying value of AMD 4,131,475 thousand (31 December 2020: AMD 4,165,159 thousand) were provided to the close business partners of the shareholders of the Bank.

### 31 Fair values of financial instruments

The Bank measures fair values using the following fair value hierarchy, which reflects the significance of the inputs used in making the measurements:

- Level 1: quoted market price (unadjusted) in an active market for an identical instrument.
- Level 2: inputs other than quotes prices included within Level 1 that are observable either directly (i.e., as prices) or indirectly (i.e., derived from prices). This category includes instruments valued using: quoted market prices in active markets for similar instruments; quoted prices for similar instruments in markets that are considered less than active; or other valuation techniques where all significant inputs are directly or indirectly observable from market data.
- Level 3: inputs that are unobservable. This category includes all instruments where the valuation technique includes inputs not based on observable data and the unobservable inputs have a significant effect on the instrument's valuation. This category includes instruments that are valued based on quoted prices for similar instruments where significant unobservable adjustments or assumptions are required to reflect differences between the instruments.

As at 31 December 2021 the estimated fair values of all financial instruments except for investment securities measured at amortised cost approximate their carrying amounts. As at 31 December 2021 investment securities measured at amortised cost with carrying amount of AMD 18,804,986 thousand had fair value of AMD 22,675,189 thousand (2020: investment securities measured at amortised cost with carrying amount of AMD 20,665,862 thousand had fair value of AMD 26,513,104 thousand). The fair value measurement of investment securities measured at amortised cost is categorized under Level 2 in fair value hierarchy.

The table below analyses financial instruments measured at fair value at 31 December 2021, by the level in the fair value hierarchy into which the fair value measurement is categorised. The amounts are based on the values recognised in the statement of financial position:

AMD'000	Level 1	Level 2	Total
Financial instruments at fair value through profit or loss			
- Derivative liabilities	-	8,469	8,469
- Derivative assets	-	11,030	11,030
- Equity instruments	392,945	-	392,945
Investment securities			
- Debt and other fixed income instruments	-	8,059,615	8,059,615
- Equity instruments	367,745	-	367,745

The table below analyses financial instruments measured at fair value at 31 December 2020, by the level in the fair value hierarchy into which the fair value measurement is categorised. The amounts are based on the values recognised in the statement of financial position:

AMD'000	Level 1	Level 2	Total
Financial instruments at fair value through profit or loss			
- Derivative liabilities	-	19,040	19,040
Investment securities			
- Debt and other fixed income instruments	-	8,190,764	8,190,764
- Equity instruments	293,326	-	293,326

The estimates of fair value are intended to approximate the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. However, given the uncertainties and the use of subjective judgment, the fair value should not be interpreted as being realizable in an immediate sale of the assets or transfer of liabilities.

Valuation techniques include net present value and discounted cash flow models, comparison to similar instruments for which market observable prices exist and other valuation models. Assumptions and inputs used in valuation techniques include risk-free and benchmark interest rates, credit spreads and other premiums used in estimating discount rates, bond and equity prices, foreign currency exchange rates, equity and equity index prices. The objective of valuation techniques is to arrive at a fair value determination that reflects the price of the financial instrument at the reporting date that would have been determined by market participants acting at arm's length.

## **32 Subsequent events**

In 2022 Credit SAL sold its shares to FISTOCO LTD. As at 7 February 2022 100% shareholder of the Bank is FISTOCO LTD. As a result of the transaction the ultimate controlling party of the Bank has not changed.
